ABSTRACT OF THE DISCLOSURE UNDER 37 C.F.R. 1.72(b)

A data sharing methodology and structure for communication between users 4 5 of digital Internet-accessible devices, such as set-top boxes, is described. Users of Internet-accessible devices can establish connections between 6 7 trusted users of other Internet-accessible devices and transfer personal information using either the Internet or the public switched telephone network 8 9 (PSTN). Some examples of the type of information that may be transferred 10 include IP addresses, e-mail, multimedia objects, and voice data. Once 11 personal identification information has been exchanged, future communications may be easily re-established and maintained. 12
